

## Every Night Astronomy: From Ancient Calendars to Harvest Moons

By Vassilios McInnes Spathopoulos

Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 214 x 149 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Does the sun always rise exactly in the east? What are supermoons and are they really so big? What is the relationship between the apparent path of the sun and the zodiac signs? Why did the ancient Egyptians worship the bright star Sirius and how is the star connected to the phrase dog days? What stars did ancient armies use for testing their soldiers eyesight? Which is the most accurate calendar in use? What is the Antikythera mechanism and could it really predict eclipses? How is astronomy connected to the famous painter Vincent van Gogh? This book provides the answers to these and a number of other similar questions in a simple and concise manner without the use of equations or complicated mathematics. It is the aim of the book to break away from the limitations of a simple introduction to astronomy and to discuss issues that will interest the average reader but that are not always covered in science books. In this sense it will provide a useful tool for amateur astronomers, science...
